

Cellular and Molecular Control of Direct Cell Interactions (Paperback)

Filesize: 3.16 MB

Reviews

It is a single of my favorite pdf. Yes, it is engage in, still an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Dr. Keeley Windler)

CELLULAR AND MOLECULAR CONTROL OF DIRECT CELL INTERACTIONS (PAPERBACK)

To download **Cellular and Molecular Control of Direct Cell Interactions (Paperback)** eBook, make sure you refer to the link under and save the document or have accessibility to additional information which are have conjunction with CELLULAR AND MOLECULAR CONTROL OF DIRECT CELL INTERACTIONS (PAPERBACK) book.

Springer-Verlag New York Inc., United States, 2013. Paperback. Book Condition: New. 244 x 170 mm. Language: English . Brand New Book ***** Print on Demand *****.The NATO Advanced Study Institute on Cellular and Molecular Control of Direct Cell Interactions in Developing System has been attended by 15 invited main lecturers and 60 participants. According to its purpose senior scientists, postdoctoral trainees and graduate students working in areas like biology, biochemistry, electrophysiology, medicine etc .could discuss their common interest in the various structural, ultrastructural, molecular and functional aspects of cell interactions in developing in vivo and in vitro systems. Whereas the topics of the first week have been mostly concerned with the general aspects of cell interactions in embryogenesis (section I and II of this book), the second week has been mainly devoted to the structures and functions of the direct cell contact sites at the membrane level as gap junctions, including electrophysiological aspects, dye coupling and selective cell-cooperation in some model systems as the neuro-muscular junctions (section III-V of this book). A multidisciplinary and stepwise approach, from initial cell contacts in early embryogenesis up to well defined selective cell cooperation, appeared to be an efficient means to provide answers to the question of how cells control, in a dynamic system as given in a differentiating embryo, their multiple temporary and permanent interactions so necessary for ordered cell positioning, cell linking and well established cell-to-cell communication. Softcover reprint of the original 1st ed. 1985.
