

Transactions of the American Electrochemical Society Volume 22 (Paperback)

By American Electrochemical Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: .important with a study of the materials themselves. 5. The seasons and the weather conditions have a marked influence on the rate of corrosion. 6. The sulphuric acid test is not a satisfactory guide for estimating the rust-resisting power of a metal. It has a certain usefulness in investigative work, but is of little value as a practical test. 7. The ordinary black scale does not appear to be a retarder of atmospheric rust. Pitting causes deterioration in a year s time approximately three times as great as would rusting if distributed uniformly over the surface. 8. bile impurities in the metal undoubtedly have an influence on the rate of rusting, it is evident that, although some are detrimental, others may be beneficial. Little accurate information appears available on this matter. 9. Heterogeneity of structure of metal is generally supposed to be antagonistic to durability, but...

Reviews

It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
