We have obviously come a long way since February 14, 1946. As electronic products have become faster and more reliable, they have also become significantly smaller and more disposable. Blackberry devices, iPods, cell phones and other small electronics are rapidly re-placed by newer models with more gadgets. Computers and laptops provide a level of computational ability that is hardly used by most people, yet still highly sought after in the marketplace. Advances in flat-screen technologies have led to a new generation of televisions. With each new technological advance and model replacement, we face an inevitable problem of electronic waste, or e-waste. There are many aspects of the e-waste dilemma: the definition of e-waste; reuse and recycling of electronics; landfill disposal and hazardous waste; regulatory issues and export economies. The EPA has already instituted several programs to deal with these problems. They include: EPAs Product Stewardship which supports stakeholder dialogues, pilot programs, public education and international cooperation to foster coordination of electronics reuse and recycling. EPAs Design for the Environment Program which works with electronics manufacturers to incorporate environmental considerations into product design. EPAs Environmentally Preferable Purchasing Program which helps federal agencies purchase environmentally preferable products. The Energy Star Program which promotes energy-efficiency products through a labeling campaign. EPAs Waste Wise Program which challenges its partners to set goals for reducing e-waste. I am grateful to the Chairman for circulating the discussion draft we have before us today and bringing this topic to the forefront. I am curious to see...
